Dhaka, Bangladesh • +8801551552954 • ahmedshafin240@gmail.com • [LinkedIn](#) • [GitHub](#)

SUMMARY

Applied Statistics and Data Science undergraduate (University of Dhaka) with a foundation in statistics, data analysis, and machine learning. Builds and ships full-stack and ERP products by orchestrating modern AI development tools across domains — with a designer's eye honed through original origami and ambigram design.

TECHNICAL SKILLS

Programming: Python, R, C++, SQL, JavaScript / TypeScript

Data Science & Statistics: regression, hypothesis testing, probability & distributions, nonparametric correlation, EDA, time-series; pandas, NumPy, scikit-learn, Matplotlib

ML & AI Tooling: XGBoost / LightGBM / CatBoost, PyTorch, TensorFlow; RAG, pgvector, Whisper, Ollama; Claude Code, Cursor, GitHub Copilot

Web, ERP & Infrastructure: Next.js, React, Supabase / PostgreSQL; Odoo 18 (custom modules, QWeb / XML / PDF reports); Git, Linux, Proxmox, WireGuard

Design & Craft: Original origami & kirigami design, ambigram design, digital art

Languages: Bangla (Native), English (Fluent)

EXPERIENCE

Odoo Developer, Taxample

Aug 2025 – Present

Part-time · Dhaka, Bangladesh

- Built custom modules for business customization per need.
- Developed custom reports and dashboards in Python, XML, and QWeb, including a sales-by-representative report and a stock-replacement / BOM spreadsheet view.
- Deployed and maintained modules in production via Proxmox LXC containers.

PROJECTS

Tax Certificate Generator · Odoo 18 · Python, XML, QWeb

- Built a complete Bangladesh income-tax certificate system in Odoo 18: configurable income heads, tax-slab brackets, and challan records linked to government verification pages.
- Automated monthly intake of employee salary and tax data via XML, and generated per-employee certificates as QWeb PDFs.

Fixeth — AI-Native Adaptive Learning Platform · Next.js, Supabase, Claude

- Designed a Bengali-first learning platform: Whisper transcription feeding a pgvector RAG knowledge base, with Claude generating adaptive, language-native tutoring.
- Built content-ingestion pipelines with n8n. Flagship project for THE INFINITY AI Buildfest 2026 (EdTech).

cppConomy — Agent-Based Market Simulation · C++

- Built an agent-based microeconomic simulation modeling Cobb-Douglas / CES production and consumer surplus, presented through a styled command-line interface.

Live Parade-State System · Rajshahi Cadet College

- Built a system to record and report daily cadet attendance and strength — an early self-taught project that digitized a manual parade-state process.

EDUCATION

University of Dhaka — Institute of Statistical Research and Training (ISRT)

2025 – 2029

B.Sc. (Honours) in Applied Statistics and Data Science

Rajshahi Cadet College — Higher Secondary Certificate (Science) · SAT: 1450

2018 – 2024

ACHIEVEMENTS

- **ISSB Green Card** — 92nd Bangladesh Air Force Academy Long Course
- **Top 20** — MillionX AI Buildathon
- **National-round selection** — Bangladesh Biology Olympiad and Mathematics Olympiad
